

Fixes

1. You can clearly see that the category dropdown is not well connected (smaller) to the left side of the search bar.

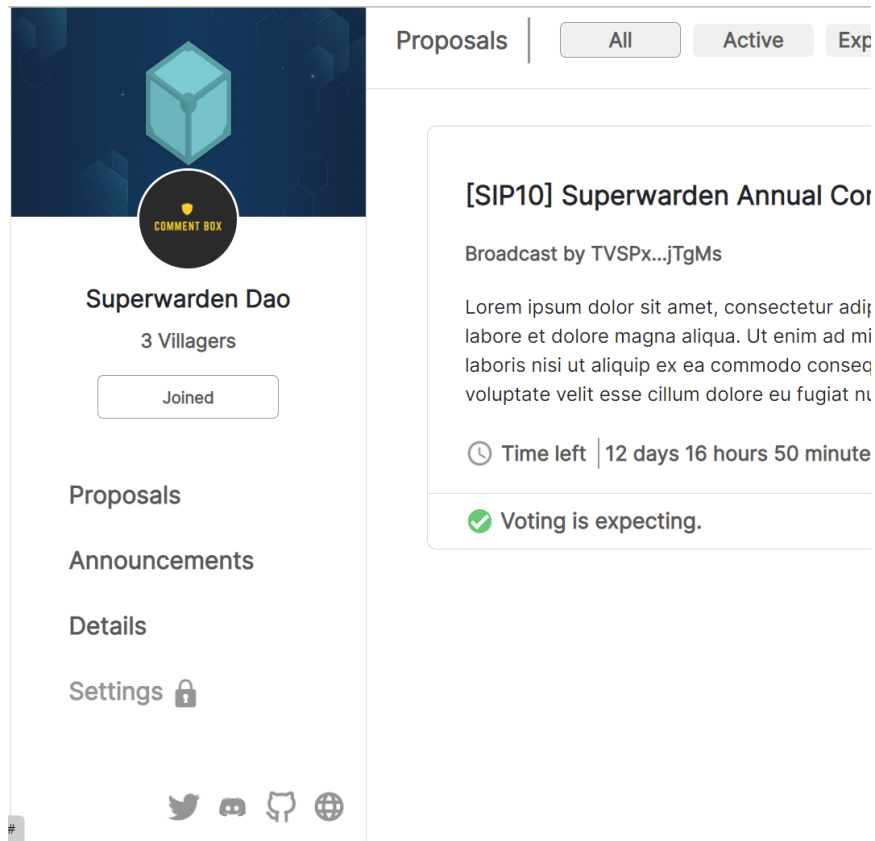

2. Leave more spaces below the end of the card listing group. Don't let it stick to the bottom. We need a generous bottom margin here.
3. Give more spaces in the card (as the info inside the card is a little pack), please refer back to Figma UI.

Townhalls

3. The side bar should be sticky, while only the content area is scrollable.

Here is another example: you can see when the content are is too long, the sidebar is not sticky, and we will have the sidebar bottom part being empty. So, sidebar need to be sticky always.

Expecting

Closed

6. What is “voting is expecting”? Please refer to the UI and also docs. We have only three statuses.

- a. “Voting under process, result will be announced soon”
- b. “N/A. Proposal do not meet the quorum threshold”
- c. The voting result (when voting is completed)

9. Spacing and the border of the dropdown. I have put a comparison of the UI and yours.

10. So, is it a valid or invalid URL? Why the error message is so weird. If the URL is invalid, should to appear valid URL.

Avatar (Recommended | 250*250 pixel)

The url of avatar is valid

An invalid avatar url

Cover photo (Recommended | 1920*1080 pixel)

 

The url of cover photo is valid

An invalid avatar url

11. As the placeholder is too long, let us remove the “Choose” word.

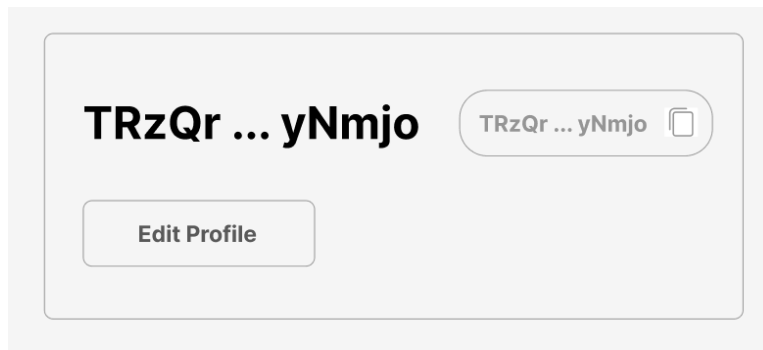

Categories

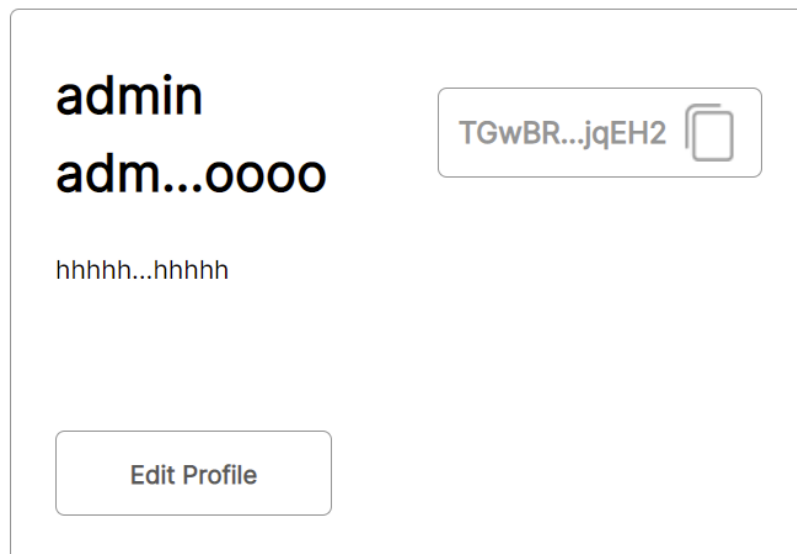

12. As I discover that, if I didn't have my own name and bio set, the profile card is super empty and weird. Hence, if at first user didn't set their name, their name will be their wallet address, and the part of the empty bio will not display first (as if empty, there is a huge gap there.)

Edit Profile

13. The substring is quite weird. For bio, **no** substring is needed (common sense), just lock the word at 120 words max. For the name, we will substring it in a way of: <five char>...<five char>. And try to fit the whole substring name in a single line.

14. Can't copy
